

Greetings!

Following the enormous success of the GT3 and the awards that we picked up for it, we are still getting requests for the model.

Best '00' gauge Locomotive Winner!

Awards
2021

When we announced the BR Blue GT3, everyone said that it wouldn't sell. Well, we sold out of the allocation in less than 2 months. We then received emails from customers who requested for us to fill the gap in the colour liveries had it stayed in service.

So now, we are pleased to announce the missing liveries. The very sharp livery of the LMS Black with lines. Then we have BR Black, early crest, and not forgetting the BR Green late crest. These will be strictly limited to 250 per livery. We have even made a certificate to confirm your number.

There will also be a new production run of the original GT3 in DCC Ready and DCC Sound. To place your order please use the link below. This will sell out fast as we have proven in the past.
