

GT3 Update #7

The tooling has begun.

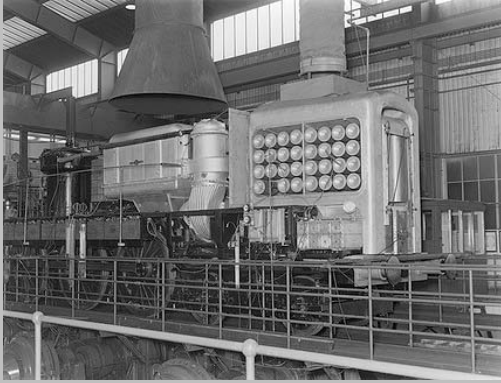

Greetings!

When we first embarked to release the GT3 on the modelling world, we never imagined that it would be as such a success as it has been. We continue to receive orders each week. So far the development of the GT3, we are on the original schedule for release date. The tooling has now begun, being completed by the end of the year. This will have production starting early next year. Our delivery schedule should be April/May 2020.

We will have the first EP sample sometime in September. The project has really come on a long way from having only photos last year. We had no idea if anyone would be interested enough to purchase the model, but have had more than expected response.

We are also now starting to work on our next project. Stay tune for the News Release in September. Our existing customers of KR Models will get this information in the newsletter.

We have had a few questions about warranty and delivery.

Warranty:

If you have any issue with your model, we will arrange the return back to us, for full replacement. This is valid for 12 months after delivery.

Delivery:

All deliveries will be sent from UK.

Future developments

We will be attending the Great Electric show in October and Warley in November. Come and say Hi. We will have the EP samples on display.
