

GT3 Update #8

The sound stage.

Greetings!

This is newsletter is for the GT3 DCC Sound customers.

The project is moving along at a pace now, the sound files will be ready to go to ESU for programming next month ready for installation during the production stage. There will be two speakers mounted in the nose of the loco to give maximum effect. The LokSound v5.0 sound decoder is proving to be very capable of recreating the sounds we need to make the model sound authentic.

Your continued support is what is making this project come to fruition.

Many thanks.

Your 3rd installment is now due.

PLEASE FOLLOW THE INSTRUCTIONS VERY CAREFULLY.

This link is only ope for 30 days..
