

WE DARE TO BUILD

## LATEST UPDATE

*Where are we with the projects?*

- 
- Website news
  - GT3 Update
  - The Fell Update
  - Future products
- 

We have been tweaking the website to make it more customer friendly. We have added a live chat service so that you can ask us questions right away. This will speed up solving any issues you may have quickly. We have also fixed the password reset button, which means you no longer have to email us and request one.

## EE GT3

The Covid-19 pandemic has really been a challenge to say the least. Some of the shipping lines have a reduced service due to infections and therefore we are monitoring the situation closely with regards to our delivery schedule. We are not alone with this issue. However, with bad news also comes good news. As you can see from the photos we have received the final painted sample from our factory, and once we sign off on it we can start production. There are a few small corrections to be made, but on the whole we're very pleased. There was some in-transit damage which won't occur when you get yours.

We hope to have the shipment in the UK in July, but this is subject to change as the current situation plays out.

The track testing went very well, we ran a sample with 10 coaches and the traction was very good. You can see it in action on our YouTube channel.

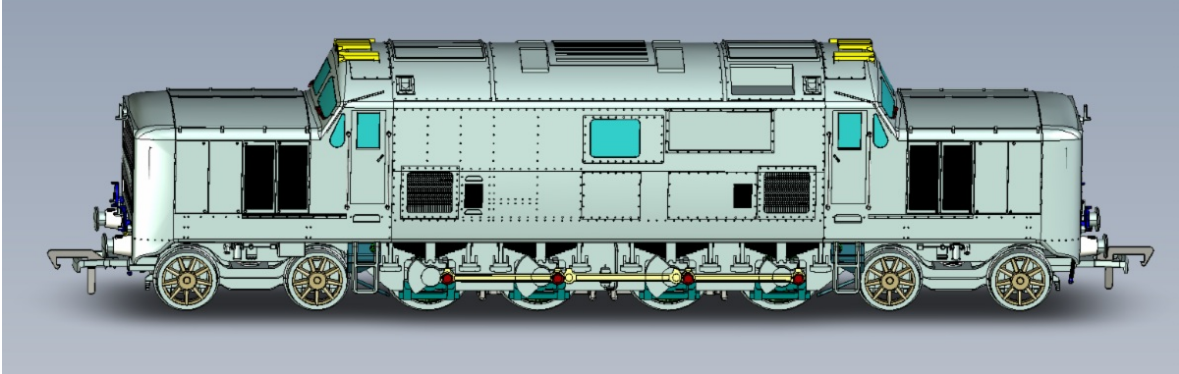

## YouTube GT3 Test running with sound

We are now getting a lot of interest in a 2nd production run. The link that new customer will need is below.

### THE FELL

Progress on the Fell is also moving along steadily. Here are the final CAD drawings with the additional full connecting rod. All you will need to do, if you do want the full rod, is remove the two rods and replace it with the full rod.

Tooling has started, and should be complete in about 6 months. Following that, we are hoping to have the first EP sample in time for Warley, that's if it's going to happen this year. That being said, we cannot make any promises on that due to our current situation. Delivery is expected to be around the 3rd quarter of 2021.

For those of you who placed their order on the day of release, 1st February, you would have noticed a few errors in your plan. Those have since been fixed, and your plan can proceed as originally intended. You would have received your updated payment schedule via email. Please note that the payment schedule is now automatic, and will take those payments every 2 or 3 months until the end of the year. You will however receive an automated call from the system informing you of the next date a few days before hand.

---

## Future Projects

We have enough potential projects to keep us going now for the next 3 years. This includes a new prototype loco, an industrial wagon, a North American steam loco and the two N gauge models.

If you have any suggestions for models or your own personal wish list of models you want to see, please email [research@krmodels.co.uk](mailto:research@krmodels.co.uk) and we will take it into consideration. We do take every suggestion seriously, so please don't be shy.
